

U-Torm

Specifications

The U-Torm is a flexible answer to the problem of suspending drop fixtures and finding tormentor positions, in a completely modular solution from Cosmic Truss.

Comprised of lightweight modules and sections, the U-Torm allows endless configurations for single fixtures, double hangs or ladders of multiple fixtures, either rigged or floor mounted.

Floor plates are available with or without casters for permanent fixing or fast deployment.

The U-Torm system has been designed for quick deployment and is fast to set up and take down in any environment.

The standard Cosmic Truss F31 range of 2" pipes, T-sections, spigots, and corner adapters fit seamlessly with any U-Torm component allowing you to create hanging positions or structures in an unlimited variety of combinations.

DATA SHEET

U-Torm

Each U-Torm is able to take a center point load of up to 110 lbs / 50kg, in a reinforced design that ensures stability.

Handy safety point attachments are fitted on each side of the U-Torm to cater for multiple fixture types.

For ladder configurations, it is possible to hang up to 10 U-Torm units beneath each other without the need for any additional rigging.

U-Torm brackets are available in a natural aluminum, or black finish as standard, and other colors can be provided on request.

Flexibility is the key with U-Torm. We've got the tools for all of your creativity.

U-Torm parts connect together quickly and easily using conical adaptors.

Pipe extensions in various lengths and T-bars are all part of our standard accessories.

U-TORM
