Stage Desk CT

The Stage Desk CT outdoor platform is a mobile stage system that can be used for any application indoor/outdoor; concerts, theatres, schools, exhibitions, or fashion shows the Stage Desk CT has it covered.

LOAD

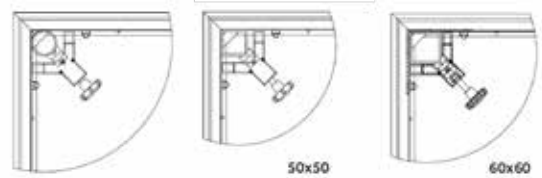

- Maximum load according to DIN 15921
- Vertical: $q=750\text{kg/m}^2$
- Horizontal: $q/20$

STABILITY & WEIGHT

- Very low tension
- Just 14.5lbs for the 2 x 1 m platform

Flexibility: Universal Platform legs

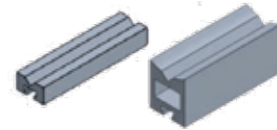

CHALLENGE

Most systems on the market use round or squared legs. Normally this is solved by changing the pressure cube to fit the corner to the leg. Additionally the pressure cube is really small. Therefore all the pressure is on the screw and doesn't provide enough stability.

SOLUTION

Our new pressure cube is useable for round as well as squared legs universally. Nothing to change anymore! To make this possible we have widened the corners. No matter which legs are used, the pressure cube will always provide a maximum of stability.
